

Simplify Your Custom Manufacturing Sourcing with Fictiv's Procure-to-Pay Integration

Tired of manually copying and pasting quote information into your organization's Procure-to-Pay (P2P) system? Looking for a seamless way to generate your procurement request and speed up your time to market? Fictiv now offers Punchout integration with market-leading P2P systems, designed to simplify and streamline your purchasing experience.

What types of P2P integration does Fictiv support?

Fictiv supports Punchout integration with P2P systems that support cXML integrations. Punchout integration streamlines the purchasing process by allowing you to transfer your Fictiv quotes directly into the cart of procurement systems, such as SAP Ariba, Coupa, MS Dynamics 365, and more.

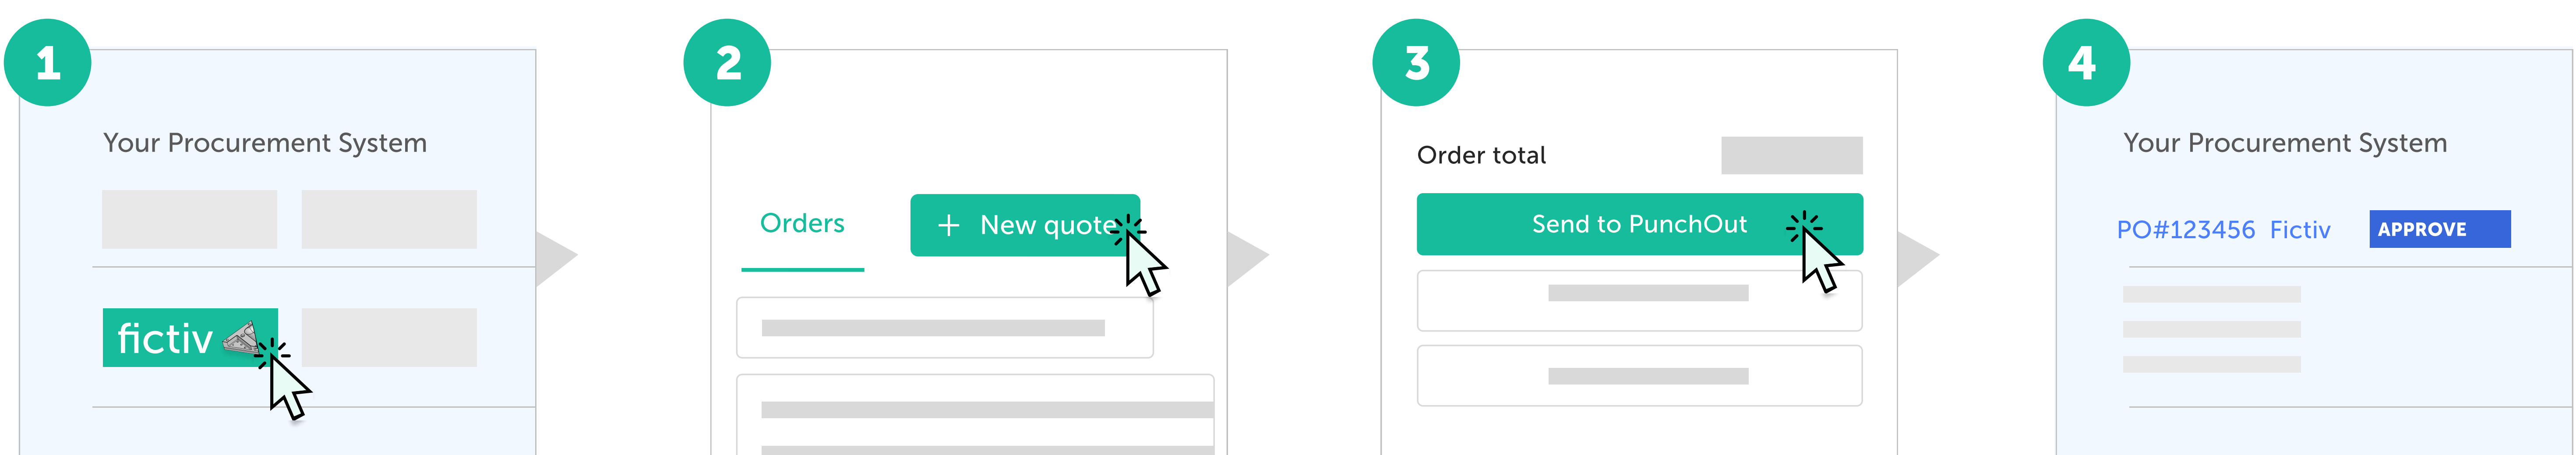

Why use Punchout integration with your P2P system?

Punchout integration with your P2P system eliminates manual data entry and the risk of errors that comes with it. And, your purchase requisitions are automatically generated, which saves you time, too.

With the new P2P integration, procurement, supply chain managers, and engineers can click a button on the Fictiv platform to instantly send their quote information to their P2P suite for convenient, custom mechanical part purchasing — increasing efficiency and flexibility, while streamlining workflows for both the procurement and engineering teams involved in the process.

How does it work?

First, we'll work with your Procurement or IT team to configure and set up Fictiv as a new Punchout Catalog with your P2P system. Once you're set up, using the integration is easy:

ACCESS

Log in to **your procurement system** and navigate to the Fictiv platform.

QUOTE

Create a new quote or open an existing quote **on the Fictiv platform**.

TRANSFER

When you're ready, seamlessly **transfer your cart from Fictiv to your Procurement system** to create a purchase request.

PURCHASE

Submit your purchase request, and a PO will be emailed to Fictiv upon approval.

GET STARTED TODAY

Be smarter with your procurement process. Simplify your custom manufacturing sourcing with Fictiv's P2P integration. Go to Fictiv's [Help Center](#) to get your P2P integration setup started today!
